“ Victoria your sweetness showed thru all the turmoil you have been in. I wish you could have got in touch before that day. I know you left many lived ones behind. It was hard and can relate to that. Sheila Redman from Speedway

“ *Oh Tori... I couldn't believe this news. You were such a strong woman and a beautiful soul. I've known you since all of us were in middle school, maybe even longer than that. Me you and Marki had soooo many great times together, and many more after you and i took different paths but we were always there together, reminiscing on the good times .. I will never forget all those times growing up, seeing you all smiles.. you were far better than you got, you deserved the world. You loved everyone regardless of what you were going through.. I hope you and your family can find peace, I hope you are watching over us all and cheering us on. We love and miss you, always beautiful!*

“ I remember when we first met when you worked at McDonald’s at the loves location. We didn’t always get along then but boy did that change in so many ways. 😭😭 I remember When your mom and you would come to a group a couple other people and I started and how much I watched you just blossom. You were always there for so many, including myself. You didn’t have a hateful bone in your body. As our friendship grew, I remember your mom only allowing certain people around you or even at her house. I happen to be blessed with being one of the very few. You’re mom and I would even crack jokes about you. 😂 We had some pretty fun times. All the way down to a simple car ride, sitting in the living room so I could change your jewelry out cause you bought cheap stuff and you knew I hated it, to nights in the car, in your moms driveway or at work at Moes and laughing at our Snapchat poses. I’m going to miss all that so much. Thank you for allowing me to be part of your life and having so many memories to share with others. I will forever miss your silly laugh and just pure love. It’s not goodbye, it’s see you later kid. I love you!
